

# SING FOR YOUR LIFE

Please join us for a remarkable presentation:

## The Amazing Benefits of Making Music

Dispelling the music gene myth, Ann Kay uses passion, research, and extraordinary stories to demonstrate how almost everyone can learn to sing in tune, and how active music making affects vitality, brain development, health, neurological disease, and possibly longevity. In addition, Ann will share research about the results of using music making to revitalize deadened classroom environments and dramatically raise student achievement, especially for hundreds of thousands of struggling readers.
